PROFILE

I'm Dheeraj, a Backend & Data Engineer passionate about building scalable, data-driven applications with clean architecture. I specialize in Python (FastAPI, Django), PostgreSQL, and Flutter, with a growing focus on AI and Machine Learning to engineer smarter, intelligent software solutions.

WORK EXPERIENCE

FREELANCE PYTHON DEVELOPER

Self-Employed | Remote
2024 – Present

- Developed automation tools and scripts using Python to improve user workflows.
- Built web applications and APIs using Django and FastAPI.
- Created cross-platform mobile apps using Flutter.
- Worked with PostgreSQL and MySQL for data management.

PROJECTS

- **Cab Booking Website**

Built a cab booking web app using Django and PostgreSQL with booking and trip management features.

- **Notes App**

Developed a notes app using Flutter and FastAPI with CRUD functionality and API integration.

- **Timetable Scheduler**

Developing a timetable scheduler using Flutter and FastAPI for task and event management.

- **Discord Tools & Automation**

Created Python-based Discord tools for automation, notifications, and server management.
